

# Combating 'One and Done': Maximizing the Impact of an Undergraduate Science Course

Peter Holden PhD  
Graduate Program in Instructional Design  
University of Massachusetts, Boston

# The Setting: Wheelock College

- ▶ A small, private college with a public mission – to improve the lives of families and children
- ▶ Common majors include elementary and early childhood education, social work, human development.
- ▶ Urban setting but adjacent to the Muddy River portion of Boston's Emerald Necklace.

# Challenge A: The Learners

- ▶ Many students have poor conceptions of the nature and process of science.
- ▶ Students often have limited or misconceived science content knowledge.
- ▶ Fears, anxieties and other negative attitudes toward science are common.

# Challenge B: Constraints

- ▶ Most majors require that students only complete one science course.
- ▶ Students often delay taking their science course(s) and select what fits into their schedule.

# The Approach

- ▶ Create a science course that accepts the reality of learner characteristics.
- ▶ Design so as to improve students' –
  - Attitude toward science/Confidence/Identity
  - Understanding of the nature of science
  - Science process skills and content knowledge

# Science Inquiry and the Earth

- ▶ Reintroduce Science.
- ▶ Use the Muddy and/or Charles Rivers as a study area.
- ▶ Allow time for personal interest to develop.
- ▶ Guide personal projects to greater sophistication.
- ▶ Encourage group work, discourse, sharing of knowledge.
- ▶ Explicitly teach earth science as content theme.

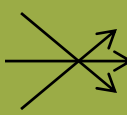

# What is meant by “Reintroduce Science”?

- ▶ Who are scientists? Creative, Experts
- ▶ What is science? Process, Knowledge
- ▶ What do scientists study? Content areas, Earth Science

# Characteristics of Creative Individuals and their Fields of Inquiry

- |                       |                      |
|-----------------------|----------------------|
| ▶ Observation         | ▶ Science            |
| ▶ Pattern Recognition | ▶ Literature         |
| ▶ Abstraction         | ▶ Painting / Drawing |
| ▶ Analogy             | ▶ Dance              |
-
